

FAASTeam presents:

Ground School Refresher: Airspace

Pop quiz: What are the differences between Class G-low, Class G-mid, and Class G-high? Where do you look it up? What happens to Class D when the tower closes? Where will you fly that you'll use this knowledge?

If it has been awhile since you sat through ground school, you may be due for an airspace refresher. In this safety seminar, we will review the different classes of airspace that are found in the United States. We'll cover their shapes, sizes, and operating rules. Special use airspace will be included in the discussion. You will leave the seminar with a renewed understanding, and probably a few memory aids to take with you on your next flight.

This safety seminar is open to current and aspiring Private Pilots, and will be of particular interest to student pilots and those who are preparing for a flight review.

Directions: Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
